PROJECTS

Neighborhood Segmentation

- Performed K-Means Clustering to neighborhoods in Bangalore and Mumbai to segment similar neighborhoods in the two cities.
- Clustered similar neighbourhoods in both the cities together into 10 clusters.
- Data was scraped from the web using BeautifulSoup and location data was fetched by calling the FourSquare API.

Hostel Room Allotment

- Developed a GUI Application to apply for a hostel room at BMSCE.
- Used Maven for project build, JavaFX and Java for front-end and back-end development and MySQL as the database management system.
- Completed as part of coursework in Java and Database Management Systems.

Odd Even

- Designed and developed an intuitive game of Odd or Even in Kotlin using Android Studio.

WORK EXPERIENCE

Software Intern

Kaleyra

06/2019 – 08/2019

Bangalore

- Developed an open-source Python SDK for Kaleyra's RESTful APIs.
- Overcame the problem of users not having to input the URL repeatedly in API testing softwares by developing a Python library which helps them to consume the API services more efficiently by configure the library once and using it seamlessly any number of time.
- This not only reduced human effort, but also gives accurate results in desired formats.
